Dear HydroMassage [AquaMED],

My patients love this bed! I hear comments like "I feel so relaxed" and "I don't want to get off of this thing". Not only do my patients think the HydroMassage [AquaMED] feels great, it helps tremendously with their conditions and helps them to relax prior to adjustments; which makes my job easier and makes them more comfortable.

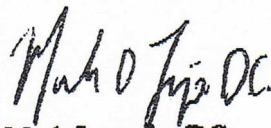

Although it varies, I see up to 30 patients per day and put at least half of them on the HydroMassage [AquaMED]. The bed has been wonderful for office flow; if my waiting room is backed up, I put patients on the bed to keep them happy. If they get to use the HydroMassage [AquaMED], they don't seem to mind waiting!

Patients tend to refer others to my facility specifically because of the HydroMassage [AquaMED]. I've even had instances where someone will come to my practice, despite it being a further distance from their home than another chiropractic office, just because we have the bed.

Not only has this bed helped with referrals, my patients are staying with their treatment plan for a longer period of time because of the HydroMassage [AquaMED]. Overall, these factors have resulted in a definite increase in revenue for my practice.

I am very pleased with the HydroMassage [AquaMED] for the effect it has had on my patients and my practice.

Thank you,

  
Mark Losagio, DC
