

# Planet Beach™

We just wanted to have a well rounded spa that had a variety of services, and to do that, you definitely need to offer massage. When I spoke with all the Planet Beach franchisees I knew from around the United States, they all suggested the HydroMassage specifically, so we went with it.

Even in this economy people still want to take time for themselves. And, while some businesses may not be doing well right now, I think our Contempo spa is doing well because we give people a feel-good, de-stressing, relaxing place to come.

We love our HydroMassage, and our members are always really excited to use it.
